

StreetSmart South Africa is a community initiative that raises funds for initiatives and programmes that support the greater process of social normalisation of vulnerable and street children's lives, in partnership with restaurants, accommodation establishments and wine tasting venues.

Partnering establishments display StreetSmart marketing material informing patrons that a voluntary R5.00 donation will be added to their bill. They will have the option to give more than R5.00 (or not give at all). This donation is registered separately in the establishment's point of sales system, and StreetSmart collects the funds. Diners and guests should see their donation reflected on their bill.

Every cent raised in StreetSmart establishments goes to local vulnerable and marginalised children programmes, namely education, skills training and family reunification. Donors supporting StreetSmart partners will be consciously contributing to the betterment of children's lives and futures.

ALL operational costs are covered through sponsorships, fundraisers and private donations.

StreetSmart provides diners and guests with an opportunity to give responsibly and not in the hands of child on the street, as this keeps them on the street.

StreetSmart South Africa is registered as a Non-Profit Company, a Public Benefit Organisation and a Non-Profit Organisation.

We invite you to sign your establishment up, in support of helping children to live a viable live in society.
