

Supplier Market Survey

Survey Objective: To assess market supply opportunity for leafy greens, culinary herbs and micro greens and possibly partner with you in the future as a supplier of choice

The Tshwane Economic Development Agency (TEDA) identified an urban vertical farm as a potential economic opportunity in the City of Tshwane. The Council for Scientific and Industrial Research (CSIR) was appointed by TEDA to assess the viability of establishing a vertical farming operation as a commercial enterprise.

There are many variations of vertical farming, the most innovative of which uses controlled environment agriculture (CEA). Benefits include:

- It saves a significant amount of water (up to about 90%)
- No negative impact on the environment, air pollution and reduced carbon footprint
- Crops can be cultivated 365 days per year & production cycles are shorter
- Generally, plants have higher nutritional value
- No use of pesticides
